MATHEMATICS OF THE USSR-SBORNIK

Volume 69, Number 1, 1991

I. I. Marchenko and A. I. Shcherba, *On the magnitudes of deviations of meromorphic functions* 1

I. D. Chueshov, *Strong solutions and the attractor of the von Kármán equations* 25

S. I. Trifonov, *Divergence of Dulac series* 37

P. A. Zalesskiĭ, *Profinite groups that act on trees and do not have free nonabelian pro-p-subgroups* 57

Yu. E. Anikonov, *On uniqueness of the solution of an inverse problem for a quantum kinetic equation* 69

V. M. Bukhshtaber and A. N. Kholodov, *Formal groups, functional equations, and generalized cohomology theories* 77

S. Ya. Yakubov, *Multiple completeness for a system of operator pencils and elliptic boundary value problems* 99

S. M. Skryabin, *Classification of Hamiltonian forms over divided power algebras* 121

G. P. Panasenko, *Multicomponent homogenization of processes in strongly nonhomogeneous structures* 143

Yu. V. Egorov and V. A. Kondrat'ev, *On the negative spectrum of an elliptic operator* 155

A. Sadullaev and R. Madrakhimov, *Smoothness of subharmonic functions* 179

V. A. Aleksandrov, *On Efimov's theorem on differential tests for a homeomorphism* 197

V. Kh. Salikhov, *A criterion for the algebraic independence of values of a class of hypergeometric E-functions* 203

Ya. L. Umanskiĭ, *Necessary and sufficient conditions for topological equivalence of three-dimensional Morse-Smale dynamical systems with a finite number of singular trajectories* 227

V. Yu. Shavrukov, *On two extensions of the logic of provability* GL 255

A. Yu. Veretennikov, *On the averaging principle for systems of stochastic differential equations* 271

V. I. Semenov, *On the Saint-Venant conditions for quasiconformal deformations* 285

E. G. Zelenyuk and I. V. Protasov, *Potentially compact abelian groups* 299

Volume 69, Number 2, 1991

S. A. Nazarov, *Two-term asymptotics of solutions of spectral problems with singular perturbations* 307

O. Yu. Èmanuilov, *Theorems on the existence of a solution for problems of controlling singular distributed systems* 341

B. D. Boyanov, *Optimal recovery of differentiable functions* 357

V. A. Prokhorov, *Poles of Tchebycheff rational approximants and the meromorphic continuation of functions* 379

A. K. Kerimov, *On the dependence of solutions of boundary value problems on perturbation of the domain by vector fields* 393

A. A. Bondarenko, *On the problem of maximality of arithmetic subgroups of indefinite orthogonal groups of type* (D_l) 417

D.-A. G. Kamuntavichyus [Darius Kamuntavičius], *The absence of nontrivial boundedly compact Tchebycheff sets in the spaces* L_φ 431

V. A. Yudin, *Riesz transforms and partial derivatives* 445

A. V. Uglanov, *Fubini's theorem for vector-valued measures* 453

A. A. Arsen'ev and O. E. Buryak, *On the connection between a solution of the Boltzmann equation and a solution of the Landau-Fokker-Planck equation* 465

A. V. Deryabina, *On increasing solutions of strongly degenerate hyperbolic systems* 479

E. V. Radkevich, *On conditions for the existence of a classical solution of the Stefan contact problem* 497

N. Temirgaliev, *Application of divisor theory to the numerical integration of periodic functions of several variables* 527

V. G. Gorbunov, *Symplectic cobordism of projective spaces* 543

A. A. Il'in, *The Navier-Stokes and Euler equations on two-dimensional closed manifolds* 559

B. I. Botvinnik, *The structure of the ring* MSU_* 581

V. V. Napalkov and A. V. Komarov, *On the expansion of analytic functions in a series of elementary solutions of a convolution equation* 597

V. A. Kondrat'ev, I. Kopachek [J. Kopáček], and O. A. Oleĭnik, *On the character of the continuity, on the boundary of a nonsmooth region, of a generalized solution of the Dirichlet problem for the biharmonic equation* 607
